PDA Training and Research Institute

Company Description
PDA’s Training and Research Institute includes a fully functional hands-on laboratory where students can learn without the risk to actual products or facilities. The Institute also provides classroom learning both onsite at the Bethesda PDA headquarters and in conjunction with PDA conferences in the US and Europe.

Technical & Major Products
There are a multitude of aseptic processing courses, including lectures and hands-on lab training in our facility. Whether you are just getting started in the industry or a member of the senior management, there’s a course to meet your specific needs. In 2014, there will be five 10-day sessions of our flagship Aseptic Processing Training Program, as well as our other courses supporting aseptic processing, including the following topics:
• Recommended Practices for Manual Aseptic Processes
• Fundamentals of Aseptic Processing
• Management of Aseptic Processing
• Quality Systems for Aseptic Processing.

Facilities
PDA’s in-house lab provides real-world experience in a training environment. The lab facilities include a fully simulated aseptic processing suite, a filling line, and an autoclave.

Markets Served
PDA’s Training and Research Institute serves those in the following areas:
• Pharmaceutical/biopharmaceutical
• Clinical manufacturing
• Hospital/compounding pharmacies
• Quality assurance
• Quality control
• Regulatory affairs
• Compliance
• Manufacturing
